

PROTECTION CONCEPT

In Switzerland, face masks are compulsory in all public indoor and outdoor areas of facilities and companies. Correspondingly also in our hotel. Thank you for your understanding.

The health of our guests and our employees is very important for us. Therefore, we have developed and implemented a detailed protection concept which is constantly adapted to the current situation. Below we have listed the most important points:

Your safety is our priority

Face masks must be worn in all public areas in the hotel. At the restaurant, in the breakfast area and in Jungfraustübli, you may remove your mask when seated.

Hand hygiene for all

Hand sanitiser dispensers are available in the whole hotel for our guests to disinfect their hands. Common contact points are cleaned and disinfected several times a day.

Enjoy good food, but keep a safe distance

The tables in our breakfast area and in the restaurant are placed so that the rules of distance can be observed. A maximum of 4 people per table is allowed, with exception of families with their own children.

Clean and effective

Our employees carefully follow all recommendations and mandatory measures of the Federal Office of Public Health. Moreover, our housekeeping team has intensified their cleaning routines. To detect an infection with the corona virus at an early stage, the temperature and general state of health of all employees is checked daily.

Despite the distance, close to you

Our Reception employees may be standing behind a Perspex screen, but the information they provide will still be transparent, informative, and helpful. Don't hesitate to contact us at anytime when on the spot.

Fast and safe

Cash payment is preferred. Please also consider paying your total bill on the evening before your departure.

Be cautious but fair

If you experience any flu-like symptoms as fever, cough or a runny nose, please refrain from travelling. If you feel ill or unwell during your stay, please inform the Reception team.
